# SUBMISSION GUIDELINES

## USSD Dams & Levees Magazine

### CONTENT GUIDELINES

- Feature articles should be between 1,500 to 3,000 words
- Departments and updates should be between 300-600 words
- Note content submitted may be edited for length
- Include name of author and co-authors, their organizations and cities
- Titles should be between five to seven words
- Must send in Word format (.docx)
- References to commercial products and entities should be minimal
- Short bio (under 100 words), photo and email for senior author

### ARTWORK GUIDELINES

- Several photos and figures are encouraged to supplement the text
- Color photos and graphics are preferred
- Include copyright credits and captions for all photos and figures
- Submit separate files (do not embed in word doc except for context)
- High resolution files are needed for print -- at 300 dpi at print size
- If you are unsure of an image size, please send ahead of time so we can check the quality
- Cover image may be chosen from images submitted

### SUBMISSION CHECKLIST

- Reach out with article proposal to discuss further
  - Receive deadline based on which issue content will run
  - Prepare, review, edit submission prior to submitting final file
  - Do not forget to include title and author(s) info
  - Must send all images, charts and figures as separate hi-rez files
- NOTE:** If your submission is also planned for publication elsewhere, please let us know so we can plan the best issue to run your submission

USSD assumes no responsibility for *Bulletin* article reviews. Technical, programmatic, peer, security and other types of reviews are assumed to have been accomplished by the author prior to submission of the article. For security concerns, please consider eliminating reference to the following when writing or reviewing an article: Description of failure modes; Details of consequences of dam failure; Normal freeboard; Figures or photos showing access to the dam; Information about exposed gates that often have significant heads of water behind them; Other vulnerabilities (especially for static conditions).
